破灭重塑使用说明

V1.35 · 分级献祭、龙族出战与酒馆返场边界

- 等级倍率按来源兵种等级计算：1级 2.0、2级 1.8、3级 1.6、4级 1.4、5级 1.2、6级 1.0；对应生命门槛为 $240 \times$ 等级倍率。
- 仅能在冒险地图中厄瑞玻斯自己的英雄军队兵种信息窗使用；战斗、城镇驻军及另一名英雄的军队不能直接献祭。
- 可献祭墓园 1—6 级基础及升级兵种；骨龙、鬼龙及其他不在白名单中的生物不能献祭。
- 只读取兵种数据库基础生命值，不计算生命类宝物、血瓶、急救术或其他临时加成。
- 结果在原兵槽生成，不需要空余兵槽，也不自动与已有骨龙合并；生命值余数会被舍弃。
- 结果为 0、来源不合格或取消操作时，部队保持不变。
- 厄瑞玻斯的原升级按钮已专用于献祭；如需普通城镇升级，请先把部队交给其他英雄。
- 按钮、右键说明、确认弹窗和结算均正常。
- 龙族范围与“龙之血瓶”一致：绿龙、金龙、骨龙、鬼龙、红龙、黑龙、圣龙、水晶龙、魔法龙、毒龙。
- 当军中至少存在一队龙族时，只有上述龙族能够进入战场；非龙单位仍可随身携带。获胜后未参战单位原位保留，失败、撤退或投降时不恢复。
- 当军中至少存在一队龙族时，每日陆地移动力只按龙族部队的原生速度标准计算；多队龙族仍由最慢的一队决定。后勤术、宝物、马厩、地形等修正保持原生结算。
- 军中完全没有龙族时，两项限制均不启用：全部部队正常出战，移动力按原生全军规则计算。
- 厄瑞玻斯初次登场及隔周正常刷新到酒馆时携带 1 骨龙；战败或逃跑后在当周酒馆返场时仅携带 1 骷髅兵；投降按原生规则保留全部兵力。

当前治疗量公式

当前治疗量公式

尤兰德 / 阿斯特拉

$$B = 5P + 10 + 10 \times \max(0, \text{clamp}(w, 0, 3) - 1)$$

H = HotA 1.8.0 原生结算：英雄每达到一个完整的 (8-n) 等级区间，在 B 的基础上提高 10%

其中 H 为最终治疗/复活生命值，B 为 HotA 1.8.0 原生治愈基础值，P 为英雄当前有效力量，n 为目标生物等级（限定为 1-7），w 为水系魔法熟练度（无/初级/中级/高级分别取 0/1/2/3）。等级增幅与最终整数取整均直接调用 HotA 1.8.0 原生特长计算；单体/群体施法范围规则保持不变。

治愈复活使用说明

- 永久复活仅属于尤兰德与阿斯特拉；其他英雄使用治愈术时保持原生治疗效果，不能复活完整尸体。
- 遵循原生治愈术的友方目标判定，可治疗存活部队，并复活符合条件的己方阵亡非亡灵部队；阵亡亡灵不会被该特长复活。
- 存活的战争机器仍按原生治愈规则接受治疗并使用上述原生数值；被摧毁的战争机器不会被专属永久复活路径重新生成。
- 复活兵力在战斗结束后永久保留。水系魔法仍按原生规则决定单体或群体施法，并通过公式中的 w 项影响治疗量。
- 完整尸体必须处于可选择状态；尸体所在格被其他部队占据时不能复活。同格重叠多个尸体时，一次只能复活当前可选中的一队。
- 保留治愈的原版动画与音效，并补充复活起身动作；不会播放转世重生的法术动画与音效。
- 战斗日志先记录施放治愈，再显示治疗量和复活结果；群体施法会逐队列出所有有效受疗单位。
- 魔法书显示当前条件下对 1—7 级生物的治疗量范围；存活目标悬停显示精确治疗量；尸体悬停保留原生“治愈”文字。
- 敌方、原生非法目标、被占据而不可选择的尸体，以及其他英雄的治愈术均不获得尸体复活效果。

Erebus

Portrait

Specialty

Spell Book

Starting Spell

Hero biography: Erebus was one of the earliest pure-blooded Black Dragons born in the ancient age. He willingly embraced death and, through sheer force of will, returned as the world's first Ghost Dragon king. The power of annihilation surrounding him twists the laws of necromancy; under his dominion, the bones of lesser undead collapse and reform into terrifying Bone Dragons that fight for him.

Hero faction: Necropolis.

Specialty effect: Ruinous Reforging — Allows the hero to reforge Necropolis undead creatures of tiers 1–6 under his command into Bone Dragons. When the army contains a dragon, non-dragon units cannot enter combat. Bone Dragons generated from a single stack: $\text{stack count} \times \text{creature database base HP} / (240 \times \text{tier multiplier})$, rounded down.

Starting army: 1 Bone Dragon.

Initial profile: Class: Death Knight; primary stats (Attack / Defense / Power / Knowledge): 1 / 2 / 2 / 1.

Starting skills: Advanced Necromancy; the spell book starts with Sorrow.

Creation Difficulty

Difficulty 5 / 5

Creative Direction

Creature-conversion framework design, base-HP sacrifice settlement, custom button design, and compatibility across the HotA and HD runtime paths.

Ruinous Reforging Rules

V1.35 · Tiered sacrifice, dragon deployment, and tavern lifecycle

- The source creature's tier multiplier is 2.0 / 1.8 / 1.6 / 1.4 / 1.2 / 1.0 for tiers 1–6 respectively; the required HP threshold is $240 \times \text{tier multiplier}$.
- Available only from Erebus's own hero-army creature window on the adventure map; never in combat, a town garrison, or another hero's army.
- Eligible sources are Necropolis tier 1–6 base and upgraded creatures. Bone Dragons, Ghost Dragons, and other non-whitelisted creatures are excluded.
- Only database base HP is used; artifacts, Elixir-style bonuses, First Aid, and temporary effects are ignored.
- The result replaces the source stack in the same slot, needs no free slot, and never auto-merges. Fractional HP is discarded.
- An ineligible source, a zero result, or canceling leaves the army unchanged.
- Erebus's one native upgrade button is dedicated to sacrifice; transfer troops to another hero for ordinary town upgrades.
- The button, right-click help, confirmation dialog, and settlement all work normally.
- The dragon set matches Vial of Dragon Blood eligibility: Green, Gold, Bone, Ghost, Red, Black, Azure, Crystal, Faerie, and Rust Dragons.
- If at least one dragon stack is present, only those dragons enter combat. Non-dragons may still be carried. They return in place after victory, but are not restored after defeat, retreat, or surrender.
- If at least one dragon stack is present, daily land movement uses only the dragons' native speed baseline; the slowest dragon still governs a mixed-dragon army. Logistics, artifacts, Stables, terrain, and other modifiers remain native.
- With no dragon stack, both restrictions fail open: the full army fights and native full-army movement calculation is used.
- Erebus starts and enters a normal weekly tavern refresh with 1 Bone Dragon. A midweek tavern return after defeat or retreat carries only 1 Skeleton. Surrender retains the full army under native rules.

Hero biography: Astra never hurries to tell others about her past, so few people know where she came from. Everyone knows, however, that she traveled to nearly every corner of the continent in search of the secrets of Water Magic. She later became an Ocean Priestess and fulfilled her ambition of mastering Water Magic.

Hero faction: Cove.

Specialty effect: Cure can permanently resurrect friendly units. For every complete $(8 - n)$ hero levels, its effect increases by 10%, where n is the target creature's tier.

Starting army: 15–25 Nymphs / 6–9 Crew Mates / 4–7 Pirates.

Creative Direction

Current Cure Formula

Current Cure Formula

Uland / Astra

$$B = 5P + 10 + 10 \times \max(0, \text{clamp}(w, 0, 3) - 1)$$

H = native HotA 1.8.0 settlement: add 10% of B for every complete (8 – n) hero-level interval

H is the final healing/resurrection HP pool, B the native HotA 1.8.0 Cure base value, P current effective Spell Power, n target tier (clamped to 1–7), and w Water Magic mastery (none/basic/advanced/expert = 0/1/2/3). Level scaling and final integer rounding are delegated directly to the native HotA 1.8.0 specialty calculator. Native single-target and mass-target rules remain unchanged.

Cure Resurrection Rules

- Permanent resurrection belongs only to Uland and Astra; Cure cast by other heroes retains native healing and cannot restore a fully dead stack.
- Native friendly-target eligibility remains in force. Living stacks can be healed, and eligible fallen friendly non-undead stacks can be resurrected; fallen undead are not resurrected.
- Living war machines remain healable under native Cure eligibility and use the restored native value; destroyed war machines are not recreated by the specialty's permanent-resurrection path.
- Resurrected troops remain after combat. Water Magic keeps the native single/mass targeting rule and contributes through w.
- A fully destroyed stack must have a selectable corpse. An occupied corpse cannot be restored; overlapping corpses allow only the currently selectable stack to return.
- Native Cure visuals and sound remain, with the stand-up motion added. Resurrection spell visuals and sound are suppressed.
- The combat log records Cure first, then per-stack healing and resurrection. Mass Cure lists every effectively treated stack.
- The spell book shows the tier 1–7 range; living-target hover shows the exact value; corpse hover intentionally retains the native Cure label.
- Enemies, native-illegal targets, occupied or unselectable corpses, and Cure cast by other heroes do not gain corpse resurrection.
